

Stakeholders for Layer 1:

Stakeholder:

- SaaS Admin

Module 1: Organization management

FR1. The system shall allow the SaaS Admin to register new tenant business and create their master account.

FR2. The system shall allow the SaaS Admin to suspend, activate, or delete permanently a tenant's account from platform.

FR3. The system shall allow the SaaS Admin to view a dashboard to show active status and basic profile for all registered tenants.

Module 2: Subscription & Billing Management

FR4. The system shall allow the SaaS Admin to manage the monthly billing for each organisation (manually initially).

FR5. The system shall allow the SaaS Admin to automatically restrict the access if payment is overdue.

Module 3: Add-on Module Provisioning:

FR6. The system shall allow the SaaS Admin to provide the ability to add or remove Add-on APIs for specific tenants.
