Layer 3

Stakeholder:

- Tenant
- Sales Manager
- System

- **Module 1: AI Trust Level Analysis (Pre-Sale)**
  FR1. The system shall send an API trigger containing customer demographic and historical data to the AI Analysis before finalizing an installment plan.
  FR2. The system shall receive a risk classification of “High Risk,” “Medium Risk,” or “Low Risk” from the AI Analysis.
  FR3. The system shall display the received risk classification directly on the Sales Manager’s dashboard.
  FR4. The system shall allow the Sales Manager to use the displayed risk classification to assist in approval/rejection of the installment plan.
- **Module 2: Customer Mobile App Restrictions (Post-Sale)**
  FR5. The system shall automatically send an API trigger to the Mobile Locking App if an installment deadline is missed.
  FR6. The mobile app shall utilize Device Policy Controller (DPC) privileges to restrict the financed device to emergency calls and the payment screen.
  FR7. The system shall trigger an automatic unlock command once the pending installment is marked as paid in the ERP.
  FR8. The mobile app shall remove all restrictions from the financed device upon receiving the unlock command.
